150 g

HFC Kitten wet food recipe is prepared with HFC ingredients, that is, originally fit for human consumption and now used in our recipes for kittens. The same quality as we would choose for ourselves. Complete wet food formula made with HFC ingredients from high biological value protein sources and rich in added minerals and vitamins for balanced kitten growth from 2 to 12 months. Free from artificial preservatives and colours. Almo Nature recommends rotating recipes regularly, by offering different protein sources and wet and dry recipes to ensure a varied diet and cater for even the most finicky of feline palates! Both the tin packaging and paper label are recyclable and, if disposed of properly, can be reused for more packaging. HFC Kitten – soft, tender texture, ideal for kittens – available in 150 g tins, ideal for owners of multiple cats. Almo Nature is the activist pet food brand owned entirely by Fondazione Capellino.
