

CHICKEN CAGE

CONSTRUCTION WARNING

MUST BE FOLLOWED TO AVOID DAMAGE WHEN USING THE OUTDOOR COVERS.

Because of the round roof the wire mesh must be pulled as tightly as possible across the top and secured around the top edge with cable ties. This will stop any 'give' in the mesh and stop water building up on the cover which may cause damage to the cover or supporting poles.

Where the mesh overlaps this should also be fixed together at the tightest point with cable ties to stop water being able to build up.
